# AMINA HAQUE

Allen, TX • (214) 609-3944 • aminashaque@gmail.com • linkedin.com/in/amina-syeda-haque • Portfolio • GitHub

## SUMMARY

Full-stack software engineer and Computer Science M.S. candidate experienced in building production web and mobile applications. Skilled in TypeScript, React, Next.js, Node.js, Python, SQL/PostgreSQL, REST APIs, Docker, and Stripe/Square integrations. Strong at troubleshooting issues, translating requirements, and delivering improvements for live users.

## SKILLS

**Application Development:** TypeScript, JavaScript, React, Next.js 15, Node.js, Express, React Native, REST APIs, Supabase/PostgreSQL, MySQL, Figma, Java, C++, C#.
**Data & Automation:** Python, SQL, data pipelines & scheduled jobs, system integrations (Square, Stripe, QuickBooks, POS and delivery platforms), ML/regression modeling, dashboards, metrics definition.
**AI:** LLM/AI API integration, AI-assisted development workflows, prototyping AI features into existing products.
**Practices & Tools:** Git/GitHub, Docker, CI/CD (GitHub Actions), Agile/Scrum, requirements gathering with nontechnical stakeholders, code review and documentation, remote/async collaboration.

## EXPERIENCE

**Full-Stack Developer & Product Builder** | Haque Systems (haquesystems.com), Remote *Sept 2024 – Present*

- **Build and ship a multi-tenant AI SaaS** to serve clients in two different industries, restaurant and tax, including customer dashboards, internal operating tools, and reporting views, with each client's data isolated from every other (Next.js 15, TypeScript, Supabase/PostgreSQL).
- **Automated manual back-office work** by integrating Square, QuickBooks, and Stripe and building scheduled background jobs, so clients stopped reconciling numbers by hand.
- **Translate business needs into technical requirements**: scope work directly with owners, turn open-ended asks into a prioritized backlog, and decide what ships each cycle.
- **Co-built and shipped MyHaq**, a cross-platform app (web, iOS, Android) with real-time in-app translation across 72 languages.
- **Evaluated and selected third-party platforms** for payments, accounting, and point of sale, then owned the integrations and the fixes when they broke.

**Software Integrator & Product / Menu Designer** | NoodleWave, Carrollton, TX *Jan 2023 – Dec 2024*

- **Owned a digital ordering rollout end to end** — iPad POS, wireless kitchen printing, and integrations across Square, DoorDash, Uber Eats, and Menufy — cutting order errors 32% and speeding service 38%.
- **Redesigned menu content and layout** from ordering data and presented the changes to ownership, balancing customer clarity against margin.

**Software Engineer & Product Developer** | Greater Dallas Youth Orchestra *Aug 2023 – Dec 2023*

- **Built an internal operating tool for a 400+ member organization**, consolidating attendance, scheduling, forms, fees, and newsletters previously kept in spreadsheets and email; gathered requirements from nontechnical staff.

**eLearning Studio Assistant** | The University of Texas at Dallas *Sept 2025 – Present*

- **Automated OBS / Camtasia / Adobe production workflows**, replacing manual steps and improving content reliability and tracking-data quality.

**Math Instructor** | Mathnasium of Allen *Dec 2020 – Aug 2022*

- **Raised student math scores 22%** using assessment data to target each student's specific gaps.

## PROJECTS

**Automated Trading Platform** | Python, Polygon.io, Interactive Brokers *2024 – Present*

- **Built a platform delivering 26% returns** across 60-day simulations — ingesting market data by API, executing through a broker integration, and validating on historical data before live capital.

**Aurora — Climate-Forecasting Web App** | Python, ML, React, GitHub Actions *Jan 2025 – Present*

- **Built an end-to-end data pipeline** over historical Texas weather data — ingestion and cleaning through ML/regression forecasts — surfaced to non-technical users in a React dashboard, backed by REST APIs and CI/CD.

## EDUCATION

**M.S., Computer Science** | The University of Texas at Dallas, Richardson, TX *Anticipated Spring 2027*

**B.S., Computer Science** | The University of Texas at Dallas *May 2025*

**Teaching Assistant / Grader** | Discrete Mathematics (undergraduate), The University of Texas at Dallas *Fall 2026*

**Relevant coursework:** Database Systems & Design, Probability & Statistics, Artificial Intelligence, Software Engineering, HCI.
