Amina Haque

Allen, TX • (214) 609-3944 • aminashaque@gmail.com • linkedin.com/in/amina-syeda-haque • Portfolio • GitHub

EDUCATION

M.S. Computer Science | The University of Texas at Dallas, Richardson, TX *Anticipated Spring 2027*

B.S. Computer Science | The University of Texas at Dallas *May 2025*

SKILLS

Languages: Python, Java, C++, C#, TypeScript, JavaScript, SQL
Testing & Validation: Unit and integration testing, test design, ground-truth validation, evaluation harnesses, debugging
Systems: Linux, Docker, REST APIs, FastAPI, Node.js, Express, PostgreSQL, MySQL, data pipelines
Security & AI: Cybersecurity research (RF emanations, CTF design), MCP, LLM/AI API integration, AI agent evaluation
Tools & Practices: Git/GitHub, CI/CD (GitHub Actions), Agile/Scrum, Copilot, React, Next.js 15, React Native

EXPERIENCE

Full-Stack Developer & Product Builder | Haque Systems (haquesystems.com), Remote *Sept 2024 – Present*

- **Build and ship a multi-tenant AI SaaS** for restaurant and tax businesses, including customer dashboards, internal operating tools, and reporting views, with each client's data isolated from every other (Next.js 15, TypeScript, Supabase/PostgreSQL).
- **Automated manual back-office work** by integrating Square, QuickBooks, and Stripe and building scheduled background jobs.
- **Co-built and shipped MyHaq**, a cross-platform app (web, iOS, Android) with real-time in-app translation across 72 languages.

Software Integrator & Product / Menu Designer | NoodleWave, Carrollton, TX *Jan 2023 – Dec 2024*

- **Owned a digital ordering rollout end to end** — iPad POS, wireless kitchen printing, and integrations across Square, DoorDash, Uber Eats, and Menufy — cutting order errors 32% and speeding service 38%.

Software Engineer & Product Developer | Greater Dallas Youth Orchestra *Aug 2023 – Dec 2023*

- **Built an internal operating tool for a 400+ member organization**, consolidating attendance, scheduling, forms, fees, and newsletters previously kept in spreadsheets and email; gathered requirements from nontechnical staff.

Teaching Assistant / Grader | Discrete Mathematics (undergraduate), The University of Texas at Dallas *Fall 2026*

- **Grade proofs and problem sets** in logic, set theory, and combinatorics.

eLearning Studio Assistant | The University of Texas at Dallas *Sept 2025 – July 2026*

- **Automated OBS / Camtasia / Adobe production workflows**, replacing manual steps and improving content reliability and tracking-data quality.

Math Instructor | Mathnasium of Allen *Dec 2020 – Aug 2022*

- Raised student math scores 22% using assessment data to target each student's specific gaps.

PROJECTS

INSuRE Cybersecurity Research | RF CTF Testbed for Agentic Emanations Analysis, NSA-sponsored *August 2026 – Present*

- **Building a capture-the-flag testbed** to measure whether LLM agents can recover hidden data from radio-frequency emanations, using a Python MCP server of signal-processing tools targeting 100% unit-test coverage.
- **Own signal generation, challenge design, and ground truth:** build the signal generator and challenge corpus whose answer keys serve as a test oracle, varying noise (AWGN), carrier offset, and frame repetition to stress-test agents scored on flag capture, SSIM, and wrong turns.

Virtual Tether – Wearable Haptic Navigation for Blind Runners | Python, YOLO, Arduino *Jan 2026 – May 2026*

- **Integrated a YOLO computer-vision pipeline with an Arduino vibrotactile wristband** over a serial link on a 3-person team, turning detected obstacles into real-time left, right, and stop cues.
- **Ran a blindfolded pilot study** (40 randomized trials plus live navigation) with a Python backend logging FPS and command metrics; overall cue accuracy of 72.5% was significantly above chance.

Automated Trading Platform | Python, Polygon.io, Interactive Brokers *2024 – Present*

- **Built a platform delivering 26% returns** across 60-day simulations, ingesting market data by API, executing through a broker integration, and validating on historical data before live capital.

VisaUiGen — AI-Powered Component Generator | React, Vite, FastAPI, OpenAI API, Visa Nova UI *July 2025*

- **Built an AI-powered web app** that converts natural-language UI prompts into Visa Nova component recommendations and renderable React code snippets.
